## Report of School Board.

---

In review of the work done the past financial year, we can confidently say that progress has been made in each school, although not in the same degree. In every instance our teachers who have had charge of studious scholars, who have attended regularly, and have been supported by home influence, which is helpful to both teacher and scholar, have acquitted themselves honorably. The indifference of parents in regard to the attendance of their children, is a greater hindrance to the success of our schools than the inefficiency of teachers. This is especially true, if the school board has exercised due caution in the selection of teachers.

In this department of our work great care is due our children, for the school is their one opportunity for life. Great care is due our tax-payers, for they are entitled to the best schools their taxes will provide. In short, great care is due to every department of our educational work; we need to be able to compare correctly the one who teaches school with the one who simply keeps school and draws pay for his or her services. We tolerate no insubordination. It will utterly destroy the efficiency of our school. More and more do we see the need of having correct views of school work and of discarding every selfish idea in regard to the selection of teachers, aiming only to serve our townspeople in the best possible manner.

The management of schools is emphatically a business transaction of no secondary importance. Upon the education of our children depends largely the future character of our townspeople. The legitimate influence of knowledge is to lead away from the lower associations of life. In proportion, as the human race has advanced in education it has advanced in civilization. Let us do our best towards keeping pace with the best methods now in use, that the generation that is to follow, may be wiser and better because we have lived.

The treasurer's report will indicate to you the use that has been made of the funds that were placed at our disposal. Agreeable to the instructions received at the school meeting

held last March we expended \$150.00 on the Valley school-house, and finding that we could not make the repairs needed for that amount, we used a small amount that the law gives us for repairs to complete the work. We raised the house, putting under hemlock underpinning, new clapboarded with pine clapboards, using paper underneath, new shingling a part of the building, sheathing the inside with the best of lumber, repaired the desks, giving the inside two coats of paint and varnish; outside we applied two coats of lead and oil, also repaired the chimney and made other necessary repairs. A jet was put on free of charge—Alonzo Newton and George Perry giving the lumber and Oren Remick, Abner Davis and C. H. Reed giving the labor, which gives the house a neat and tidy appearance both inside and out.

The house is now in good condition and will last for many years. We have painted the school house at Riverton with two coats of lead and oil, at a total cost of \$38.33; also purchased a new stove for the school room, a new blackboard for the school room at the Meadows. New books have been furnished all our schools wherever needed. A new series of copy books and arithmetics have been supplied, which in our judgment was a much needed outlay. And in conclusion we have only to express our thanks to those who have through home influences aided us in successfully caring for our school interests.
